Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

The drawings were received on 11/15/05. These drawings are approved. Additionally a clear formal version of Fig. 1 is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12, 15, 16, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuhn. Kuhn discloses the claimed device and may be used for the same purpose. As Kuhn notes his target may be shot at. Moreover, because Kuhn discloses every feature claimed it is inherently capable of the same use. Concerning claim 19, elements 74 and 86 may be considered the levers.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuhn in view of Pidde et al. (Pidde). Kuhn discloses the claimed device with the exception of the protective plate. However, as disclosed by Pidde, such (7) are known in the art. It would have been obvious to one of ordinary skill in the art to have included such with Kuhn's device to protect the operating elements of the device and to hide the target plate when it was down.

Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuhn in view of Fosseen. Kuhn discloses the claimed device with the exception of the sensor. However,

as disclosed by Fossean it is known in the art to use sensors on such targets. It would have been obvious to one of ordinary skill in the art to have included such on Kuhn's target as well to automate it.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kuhn. Although Kuhn states that his device is lightweight he does not specifically state that each part is portable by a single person. However, it would have been obvious to one of ordinary skill in the art that Kuhn's modular target (fastened together with nuts and bolts) could have been made as portable as claimed if it was desired to transport it easily.

Claims 21-32 are allowed.

In response to applicant's remarks regarding the other claims, as noted above Kuhn specifically states that his device may be shot at with a projectile other than a ball. At the very least this would include a pellet gun which may be considered a light infantry weapon. Moreover, how Kuhn's device is used is not at issue.

Applicant's arguments filed 11/15/05 have been fully considered but they are not persuasive.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

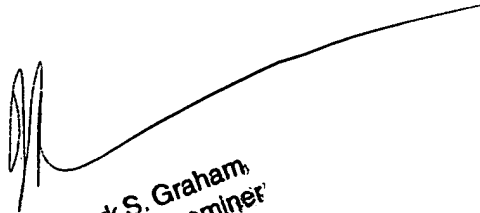

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 3711

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
